In simple words, to explain the **Alpha and Omega** in terms of First Century and the end of the age.

First Century summary

the Attack on the Omega - came first with the Docetic doctrine using the Alpha=spirit to downgrade the Material aspect of the Omega which = the Incarnation and the fact that Christ had to come in the flesh to sit on the literal throne of David over planet earth.

The Alpha of that day was in reality an attack on the 'Omega sonship' of David.

21st Century summary

"OMEGA - startling nature"

The Omega heresy of the latter days - is the inverse of the first century heresy.

Its full attack is upon **First Angel**, by using an erroneous definition 'Sonship', in order to attack the **Alpha** - by placing it in the role of a **diminished Sonship** = 'God Eternal Son' = FB #2 - rather than the Eternal Righteousness of Christ – who, was also, an **Everlasting Father**. Isa 9:6-7 = John 1:1

Fulness of the Godhead bodily implies former Identity as "**Everlasting Father**" and the present acquired role of Sonship as in Incarnation of Romans 1:3 - implies fulness of Godhead, as well.
